

DIWA-Evo

Glass and dishwashing liquid

- ▶ Dishwashing liquid for commercial single-tank and multi-tank dishwashers
- ▶ Fast and thorough removal of food residue, as well as tea and coffee remnants
- ▶ Reduces the build-up of starch on items
- ▶ Very effective for all water hardness levels
- ▶ Prevents the formation of limescale deposits
- ▶ Free from NTA, chlorine and phosphate
- ▶ Protects the material
- ▶ Awarded with the European Ecolabel

Area of application

For all types of alkali-resistant items made of porcelain, glass, stainless steel and plastic. Do not use to clean aluminium, rubber and items with sensitive decorations.

Application

Please test on a small inconspicuous spot before first application. Consult the manufacturer's instruction manual.

Mechanical dish washing:

Recommended dosage

Recommended dosage for dishwashers	
Hardness level 1 (< 1.5 mmol/L)	1 g/L of water
Hardness level 2 (1.5–2.5 mmol/L)	3 g/L of water
Hardness level 3 (> 2.5 mmol/L)	5 g/L of water

The dosage values lie between 1.5–5 g/L of water.

Dosage takes place using the machine's integrated dosage mechanism or with the programmable KIEHL dosage devices. In order to achieve the best possible cleaning result, the dosage is based on specific conditions (water hardness, level of soiling, type of machine).

Consumption depends on the specific conditions and specifications.

Ensure an optimum cleaning result by combining with the rinse aid DIWA-Pronto. When replacing the product, the dosage device and attached hoses must be thoroughly rinsed with water.

Note

Kiehl accepts no liability or responsibility for damage caused as a result of incorrect use or application of the product. Not a consumer product according to 1999/44/EC Art. 1! For professional use only! By dosing correctly and using the lowest recommended temperature, you can help to reduce water pollution and to save energy and water. You can find information about your local water hardness level from your local water supplier. Packaging material is recyclable.

Ingredients (according to 648/2004/EC)

Phosphonates $< 5\%$, polycarboxylates $< 5\%$, alkalis, corrosion protection.
pH value (concentrate): approx. 13.5

pH value (ready-to-use solution): approx. 10.5

Art. No.	Packaging unit (PU)	Contents in kg	Numbers of PU per pallet
j567210	10 L canister	12.0	60
j567221	20 L canister	24.0	36
j567272	200 L drum	240	2
